

Let gravity do the work

IDEAL FOR **BUILDERS • ROOFERS • SCAFFOLDERS • RENOVATORS**
SUPPLY HOUSES • RENTAL STORES • MASONS • DEMO CONTRACTORS

Aussie Chutes are the strongest, safest and most durable rubbish chutes on the market.

Available for hire or sale.

At Aussie Chutes Hire & Sales, we manufacture, install and offer maintenance on rubbish chutes for all high rise and low rise projects. Excellent, friendly, hassle-free service with fast response times. We are on call 24/7 to best meet your needs.

Rubbish chutes make the ideal system for transporting debris from various levels of a structure to ground level. Keep your work site clean and free of rubbish, increasing safety and saving time. Avoid holding up the lifts and the crane and moving bins around the work site - chutes enable rubbish removal through one central point.

Our side entry hoppers allow debris to be loaded from different levels *simultaneously*.

DAMAGE RESISTANT

Made from extruded high-density polyethylene - the superior grade of high-density polyethylene used in our chutes ensure maximum resistance to abrasion and cracking even in extreme temperatures.

Chutes are fitted with steel brackets which are proof tested to 1000kg and connected via heavy duty chains.

LIGHTWEIGHT & STACKABLE

Our chute sections are lightweight easily manageable for one person.

They are tapered and stack together - saving valuable space for transporting and storage.

AVAILABLE IN 2 SIZES:
- 600mm & 800mm

Cleaner, safer work sites through faster, more efficient rubbish removal.

Aussie Chutes meet Work Cover safety standards with anti-spill solid guards and lockable loading hoppers which are firmly fastened at each floor.

INSTALLATION

Aussie Chutes can be mounted on to a concrete slab, scaffolding or hung from a parapet or window. A full installation service is available

RECYCLE

Recycle and save money. Separate rubbish at the point of generation by using multiple chutes and labelling to dramatically reduce the cost of dumping waste.

30% of all waste dumped is generated from the building industry. Help do your bit to save the environment - and save cash in the process!
