Aussie Chutes are the strongest, safest and most durable rubbish chutes on the market.

**IDEAL FOR BUILDERS • ROOFERS • SCAFFOLDERS
LARGE MATERIALS HANDLING • SUPPLY HOUSES
RENTAL STORES • MASONS • DEMO CONTRACTORS**

AVAILABLE FOR HIRE OR SALE.

At Aussie Chutes Hire & Sales, we manufacture, install and offer maintenance on rubbish chutes for all high rise and low rise projects. Excellent, friendly, hassel-free service with fast response times. We are on call 24/7 to best meet your needs.

Rubbish chutes make the ideal system for transporting debris from various levels of a structure to ground level. Keep your work site clean and free of rubbish, increasing safety and saving time. Avoid holding up the lifts and the crane and moving bins around the work site - chutes enable rubbish removal through one central point.

Our side entry hoppers allow debris to be loaded from different levels *simultaneously*.

DAMAGE RESISTANT

Made from extruded ultra high molecular weight polyethylene (UHMWPE) - the virgin grade of UHMWPE used in our chutes ensure maximum resistance to abrasion and cracking even in extreme temperatures.

Chutes and are fitted with steel brackets which are proof tested to 1000kg and connected via heavy duty chains.

LIGHTWEIGHT & STACKABLE

Our chute sections are lightweight easilymanageable for one person. They are tapered and stack together - saving valuable space for transporting and storage.

CLEANER, SAFER WORK SITES THROUGH FASTER, MORE EFFICIENT RUBBISH REMOVAL.

Aussie Chutes meet Work Cover safety standards with anti-spill solid guards and lockable loading hoppers which are firmly fastened at each floor.

INSTALLATION

Aussie Chutes can be mounted on to a concrete slab, scaffolding or hung from a parapet or window. A full installation service is available.

RECYCLE

Recycle and save money. Separate rubbish at the point of generation by using multiple chutes and labelling to dramatically reduce the cost of dumping waste.

30% of all waste dumped is generated from the building industry. Help do your bit to save the environment - and save cash in the process!

SPECIFICATIONS

CHUTE	STANDARD	LARGE
Length (Actual)	1350mm	1670mm
Length (Effective)	1160mm	1500mm
Diameter (Tapered)	590mm-540mm	770mm-700mm
Thickness	6mm	6mm
Weight (Including Chains)	12kg	24kg
Material	Ultra High Molecular Weight Polyethylene UV Stabilized	
SIDE LOADING HOPPER	STANDARD	LARGE
Length (Actual)	1350mm	1670mm
Length (Effective)	1160mm	1500mm
Width	Max 620mm	Max 800mm
Projection	Max 350mm	Max 350mm
Angle	50°	50°
Weight	18kg	30kg
Material	Ultra High Molecular Weight Polyethylene UV Stabilized and Aluminium	
TOP DUMP HOPPER	STANDARD	LARGE
Length (Actual)	1350mm	1700mm
Length (Effective)	1160mm	1500mm
Width	Max 700mm	Max 900mm
Projection	Max 170mm	Max 200mm
Angle	20°	20°
Weight	15kg	27kg
Material	Ultra High Molecular Weight Polyethylene UV Stabilized and Aluminium
